Office Action Summary Examiner Art Unit
10/632,231 WALKER, DONNA M.
Application No. Applicant(s)

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-30 and 33-34 are, drawn to a method of changing a physical property of a structure, classified in class 148, subclass 565+.
- II. Claims 31-32, drawn to a system for changing a physical property of a structure, classified in class 266, subclass 78+.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as surface alloying.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sikyin Ip whose telephone
